- 1 USB Server Interface Unit

Description

This USB Server Interface Unit connects a USB server to a B064-Series NetDirector® KVM switch using Cat5e/6 cabling. Use of Cat5e/6 cables frees up space in server cabinets that would otherwise be filled by traditional, bulkier KVM cable kits. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.
Note: SIU's that were purchased prior to that of your KVM switch may require a firmware upgrade in order for them to work properly (see Maintenance under OSD Operation section of your B064-Series KVM Owner's Manual for details)

Features

- Eliminates the need for thicker, heavier KVM cable kits
- Compact, lightweight design
- Plug and Play; no software required
- No power supply required
- 164 ft. (50 m.) distance from KVM switch
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Note: Support documentation for the B055-001-USB is under the B064 series, as this is an accessory for those models.
